Intent Agent (External)
LLM / RL / Heuristic Policy pi(o_t) -> a_t
action a_t
observation o_t
Evaluation Testbed
Intent Execution Layer
Pause-Query-Action Protocol
Action Validator (terrain, capacity, threat zone)
State Serializer (JSON export)
log decision
execute valid action
log metrics
Network Model Layer
QoS Capacity Model (eMBB/URLLC/mMTC slice allocation)
Backhaul Graph (BFS connectivity validation)
Coverage Computation (distance-based signal, multi-cell handover)
Evaluation Layer
KPI Time-Series Recorder
Decision Logger (JSONL append)
Counter-Factual Regret Estimator
Reasoning Quality Analyzer
connectivity affects behavior
generates demand
Demand Generation Layer
Day/Night Fatigue Cycle
activity schedule
Autonomous Economic Agents
demand spikes
Flashmob & Stochastic Events
